

Executive Overview

Ardor IT Solutions delivers enterprise transformation programs powered by research-backed methodologies and engineering excellence. Our frameworks ensure modernization that is rapid, resilient, and strategically aligned.

Research Foundation

Technology & Market Intelligence

Cloud, AI, cybersecurity, ERP modernization.

Organizational & Talent Research

Operating models, capability maturity, productivity benchmarking.

Architecture Standards

Hybrid cloud, Zero Trust, container platforms, SAP architecture.

Performance Benchmarks

Cloud cost governance, DevSecOps velocity, financial efficiency.

Proprietary Frameworks

Digital Transformation Framework (ADTF)

Strategy → Diagnostics → Architecture → Roadmap → Governance → Optimization.

Hybrid Cloud & Engineering Framework (H■CEF)

Cloud readiness, landing zones, modernization engine, FinOps.

SAP Digital Core Framework

Data, migration pathways, analytics, automation.

AI & Data Value Framework (AVRF)

Use-case prioritization, MLOps, governance, ROI.

DevSecOps Acceleration Model

CI/CD, automation, security integration.

Accelerators & Tools

- Cloud landing zone blueprints
- Infrastructure-as-code kits
- SAP process mining tools
- MLOps templates
- Security & compliance bundles
- DevOps automation pipelines

Value Delivered

Our frameworks enable faster modernization, improved engineering velocity, stronger security posture, enhanced decision-making, and predictable enterprise outcomes.

Conclusion

Ardor IT Solutions stands as a research-driven transformation partner with frameworks designed for clarity, speed, and measurable business value.
